

Free e-Learning for Texas Mutual policyholders

Texas Mutual policyholders have exclusive access to our free e-Learning tool to help train employees, verify completion and maintain records.

e-Learning offers approximately 200 modern, high-quality video courses on workplace safety, and our course catalog continues to grow.

Each video is accompanied by a quiz at the end, and periodic check-ups throughout to help employees learn. You'll see the employee's score after the quiz has been completed.

You can assign courses, post reminder messages for employees and check completion statuses all in one convenient place.

e-Learning offers free recordkeeping for all courses completed through the tool for as long as you're a Texas Mutual policyholder. This can assist with fulfilling OSHA reporting requirements as well as maintaining your company's own training records.

Ready to start using e-Learning in your workplace?

Log in to texasmutual.com, click the Safety Resources tab, and take our e-Learning tour to get started.

For further assistance, call Texas Mutual's safety services support center at 844-WORKSAFE.
